

# GTO®/ACCESS SYSTEMS

## COMMERCIAL SERIES

### UNIVERSAL RECEIVER RB709U-NB

## STANDARD FEATURES

**RB709U-NB**

The Universal Antenna (part # RB709U-NB) Receiver gives you the ability to use one remote to activate your gate operator and your garage door opener.

The normally open relay on the Universal Receiver can be connected to the push button terminals on most garage door openers.

The RB709U-NB also receives and decodes the special signals from GTO wireless access devices such as, the wireless vehicle exit sensor (R4500).

- Converts garage door openers to work with GTO Access System Remotes (radio controls).
- RF frequency 318 MHz
- Connects easily to any brand of gate operator or garage door opener.
- Up to 100 feet range
- Power supplied by access controller
- Weather-resistant housing for outside or indoor mounting.

**RB741**

Standard one button transmitter for a GTO gate operator.

**RB742**

Two Button Transmitter with keychain. Controls one or two gate operators(s) or garage door openers(s).

**RB743**

Three Button Transmitter. Controls up to three gate operators(s) and garage door openers(s).
